

IN THE SPECIFICATION

Replace the paragraph beginning on Page 5, line 3, with the following amended paragraph:

The rotation of the labels of the triangle feature, summarised in table 3 below, follows that of the image except that the text label may be further rotated 60 degrees, 120 degrees, 180 degrees, 240 degrees or 300 degrees clockwise such that the label remains parallel to the side of the triangle which is closest to horizontal and such that the text of those labels remains upright. As the text labels have 3 possible orientations with an constant angular separation between them, the maximum deviation from the horizontal is ± 30 degrees. As can be seen from each of Figures 1A-1F, 2A-2H, 3A-3N, 4A-4E and 5A-5K, an orientation of each character within the text label remains constant with respect to other characters in the text label as the text label is flipped such that a given first character having a given second character positioned substantially to the right, has the given second character positioned substantially to the right in each orientation of the text label.
